green

"The coloured states are numbered starting at zero" makes no sense because the edges have colour names, and these represent transitions.

$$(b) \quad \overline{A+B} = \overline{A} \cdot \overline{B}$$

$$A = A(B + \overline{B})$$

I'll edit/annotate in this box electronically

$$\oint V dv = 0$$

kind of makes it  
a bit simpler.

because I forgot something, opps.

(c) 

$$\oint_V \psi_r dv = \int_0^h \int_0^l \int_0^w \psi(x, y, z) dx dy dz$$

$$\psi(x, y, z) = x + 2y - z^2$$
